

I am writing with much concern in regards to the lifting of the limit of media outlet ownership. America is made up many different cultures and ethnic groups. These differences are what made and continue to make America great! However, our media outlets such as TV and Radio do not reflect that (DIVERSITY). Now, with the great possibility of the media market being deregulated even more for the MEGA media owners to own even media outlets will only set back America even more from having diversity on the airwaves, papers, TV and such. The only people that will benefit from this harsh move, if passed, are the MONOPOLIZERS of the media market that already own far too much as it is! It's bad enough that in some cases, the TV stations, radio stations, News papers, cable companies, and concert venues are all own by the same company! Something is truly wrong with this! It's bad enough that we are already being "spoon fed" by these pre-existing media outlets. Now with the threat of our rights to have different options given to us, and for us to be able to express them over the airwaves, paper, TV and such (the American public) is under GREAT DANGER! Is this America, or Old World Russia? I am asking that this issue be given more time to be looked at very carefully by the AMERICAN PUBLIC, after all, the airwaves belong to the people, ALL AMERICAN PEOPLE!
